

Minami-Azabu 3-chome Site News

In this News, we will inform you of the latest information about Minami Azabu 3-Chome Provisional Nursing Facility site.

The development plan has been completed.

From September to October 2024, we held a briefing session on the development plan (draft) and called for public comments.

Thank you for attending the briefing session and for your many comments. We have reviewed your comments and reflected them in the development plan.

By reading the two-dimensional code on your smartphone or other device, you can read the development plan.

Starting in December, architectural design firms and contractors will be selected.

Since there are many complex issues regarding road and location conditions at the planned site, we will publicly recruit excellent companies with proven experience, track record, and high technical capabilities. The same company will carry out both design and construction work in an integrated manner.

If you have any questions or concerns, please contact Minato City.

We are planning to hold lectures and other events for local residents to deepen their understanding of welfare for the handicapped.
