Sorting recyclable plastics P6~P7

In Minato City, we collect various kinds of **plastics** as **resources**. We ask for your cooperation in sorting and recycling plastics.

Sorting recyclable paper P8~P9

We can recycle some paper such as boxes for snacks and tissues, and advertising flyers, which tend to be discarded as combustible waste. Please put them all together on the day for recyclable items, either by **putting them in a paper bag** or **between the leaves of a magazine**.

Collecting wooden furniture for free

*There are conditions. For details, please refer to page 26 before contacting us.

Furniture Recycling Display (9:30~16:30)

Closed on Sundays, the 3rd Thursday of every month. Dec.28-Jan.3

For wooden furniture that is still usable, please use the service to collect furniture free of charge.

Please cooperate in sorting waste

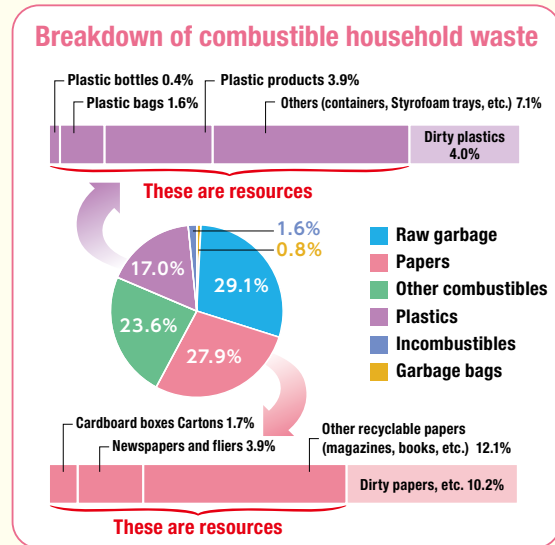

Valuable resources are disposed of as waste!

The amounts of Minato City's resources and waste have not changed much over the past few years, but according to the Waste Survey conducted by the City in 2022, recyclable materials such as paper and plastics are included in large quantities in combustible waste, which make up the largest part of household waste. To reduce the amount of waste and to effectively use resources, please follow the rules for sorting recyclables and waste.

1 Amounts of resources recovered and waste collected by the City

2 Breakdown of combustible household waste (from the FY2022 Waste Survey)

Minato City Third Waste Disposal Basic Plan sets targets for the amount of waste per resident.

We formulated the Minato City Third Waste Disposal Basic Plan. It sets targets for reducing the amount of waste and for sorting, recycling, and reusing the waste generated for the next 12 years from FY2021 until FY2032.

Numerical Targets		Target values for the amount of waste etc. per capita per day*		
		FY 2019 (Actual value)	FY 2026 (Interim target)	FY 2032 (Final target)
1 Total Waste Generation	Shows the total amount of waste in the entire City, consisting of waste collected by the City and brought in by businesses as well as collected resources.	1,880.6 g/capita/day	1,583 g/capita/day	1,313 g/capita/day
2 Combustible Waste Collected by the City	Shows the amount of combustible waste that the City collects from households and others.	531.6 g/capita/day	397 g/capita/day	287 g/capita/day
3 Percentage of Resources Mixed into Combustible Waste	Shows the percentage of resources contained in the amount of combustible waste collected by the City, representing the current state of waste sorting.	25.7%	24%	21%
4 Food Waste Generation	Shows the amount of food waste at home among the combustible waste collected by the City.	55.5 g/capita/day	37 g/capita/day	22 g/capita/day
5 Plastic Generation	Shows the amount of plastics in the entire City, consisting of "plastics mixed into combustible and non-combustible waste" and "recyclable plastics, plastic bottles and caps". Incineration of plastics also contributes to greenhouse gas emissions.	132.8 g/capita/day	116 g/capita/day	101 g/capita/day
6 Recycling Rate	Shows the ratio of resources to waste collected in the City, representing the results of household efforts to reduce and recycle waste.	29.3%	40%	50%
7 Collected Resources	Shows the total amount of resources collected at collection points and group collection, representing the results of resource recycling efforts.	234.6 g/capita/day	289 g/capita/day	317 g/capita/day
8 Collected Resources by Group Collection	Shows the amount of resources collected by collection groups, representing the results of resource recycling efforts through the participation and collaboration of residents in the City.	59.2 g/capita/day	65 g/capita/day	67 g/capita/day
9 Sorting of Waste and Resources	Shows the percentage of people who answered in the "Minato City Survey" as "properly sorting resources from waste", representing the residents' awareness of waste sorting.	39.7%	53%	65%
10 Waste Brought in	Shows the amount of waste (general waste) generated and brought in by businesses to the Minato Incineration Plant, representing the results of efforts by businesses to reduce and reuse waste.	103,020 t/yr	90,100 t/yr	79,000 t/yr
11 Recycling Rate in the Recycling Plan	Shows the recycling rate specified in the "Recycling Plan" that businesses with a total floor area of 1,000 m ² or more are required to submit, representing the results of their efforts with regard to paper and kitchen waste (food waste) which account for the majority of waste.	paper : 60 % kitchen waste : 14 %	paper : 66 % kitchen waste : 20 %	paper : 72 % kitchen waste : 25 %
12 Greenhouse Gas Emissions	Shows the sum of CO ₂ equivalents emitted from the incineration of combustible waste and CO ₂ emitted from the incineration of plastics, representing the amount of greenhouse gas emissions that contribute to global warming.	22,372 t-CO ₂ /yr	18,300 t-CO ₂ /yr	14,900 t-CO ₂ /yr

* 9~12 mean annual targets for the entire City.

Efforts to reduce garbage

Sorting list for recyclables and waste

Reduce unnecessary plastics!

Let's implement the 3Rs

Keep in mind not to waste! Let's make a recycling-based society.

Our living is affluent with goods. And everyday, a lot of goods are produced, consumed and disposed. However, the Earth's resources are limited. For the future of the Earth, we have to try not to waste things and aim at realization of a recycling-based a society where limited resources are recycled.

Let's take a second look at our lives and tackle the reduction of waste as a firsthand effort.

3

Reduce waste with the 3Rs!

The key words to reduce waste are the three Rs.
We will be able to reduce waste with a little bit of effort.

The 1st R is Reduce

Don't throw out garbage

Let's put it to practice!

- ☆ Let's buy only in the needed amount.
- ☆ Let's not have any leftovers.
- ☆ Bring your own bag during shopping.
- ☆ Let's buy products with simple packaging if they are the same.

Minato City's character of reduce
Danjiru

The 2nd R is Reuse

**Use it again
repeat usage**

Let's put it to practice!

- ☆ Use reusable tableware instead of paper plates etc. during festivals and events.
- ☆ Give old clothes, etc. to people, or put them out to the city's collection point.

Minato City's character of reuse
Reuse-ke

The 3rd R is Recycle

Use rehabilitated items

Let's put it to practice!

- ☆ Let's follow the rules and correctly segregate recyclable materials from garbage.
- ☆ Let's remove dirt from plastic containers and the like with old cloth and waste water before disposing them on the day for recyclable plastics.
- ☆ Let's actively buy recycled products.

Minato City's character of ecology
Ecole

Use Minato Eco Shops!

Minato Eco Shops are retail stores in Minato City that are actively engaged in reducing waste and recycling. A list of Minato Eco Shops and their respective efforts is available on the official Minato City website. Use Minato Eco Shops regularly for eco-friendly shopping.

Look for this sticker or nameplate to find a Minato Eco Shop.

Minato Eco Shop sticker/nameplate

What is "food loss" ?

Food loss refers to food that is disposed of as waste even though it is still safe to eat, such as leftovers, vegetable skin peeled too thickly during cooking preparation, and foodstuffs that have passed their best-by dates. In Minato City, of the combustible waste collected by the City, about one-third of household waste and one-second of business waste (from companies and restaurants) is raw garbage that includes food loss. Minato City aims to reduce combustible waste by working towards minimizing food loss.

what we can do

"3 alls" activity (Use all, Eat all, Drain all the water)

"To reduce food loss, it is effective to "use all" and "eat all". To reduce garbage, let's work on the "3 alls" together with "drain all the water".

● Use all Purchase only what you need, and use it up without waste!

- ▶ Before going out, check the refrigerator, and make a shopping plan
- ▶ Take advantage of buying things in small quantities, and avoid buying too much
- ▶ Freeze food to keep it, and use up all the ingredients

● Eat all Let's enjoy food without leaving anything!

- ▶ Make only as much food as you can eat
- ▶ Re-use any food remaining in different ways

● drain the water About 80% of garbage is water. Before you throw it out, drain all the water thoroughly!

- ▶ Don't allow food ingredients to get wet
- ▶ Let garbage dry in a well-ventilated place before taking it out

Food Drive

For details, see the Minato City Website.

This program collects unused food left over from households and provides it to people in need. Minato City provides the collected food to the Minato City Living and Employment Support Center, the Minato City Children's Cafeteria Network, facilities for supporting mothers and children, and NPOs (food banks).

We collect food at the Collaboration Project Section of each Regional City Office, Daiba Annex, Shirokanedai Iki-iki Plaza, Home-based Palliative Cancer Care Support Center, Eco Plaza, Minato Recycling and Waste Management Office.

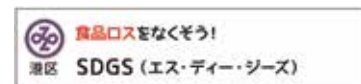

For specific collection locations, see page 23.

Let's use 'Stop Food Loss Partner Restaurants'

In the ward, restaurants that are actively reducing food loss, such as by introducing small serving menus, are registered as 'Stop Food Loss Partner Restaurants'.

Contribute to reducing food loss by using 'Stop Food Loss Partner Restaurants'.

You can identify them by the sticker (example) they display, shown on the right.

Recyclable plastics

Collected
Once
a week

8:00 am

Please put out before 8:00 am. Please don't put it out on the night before the collection day or after the collection time. We cannot collect other garbage than recyclable plastics.

Please sort out the plastics with identifying "Pla Mark" (♻️) as recyclable plastic. Please rinse before disposal. (Please take out products made of fiber such as polyester as combustible waste.)

Examples

Film and bags

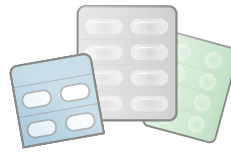

Plastic bottle labels

Plastic bags

Snack bags

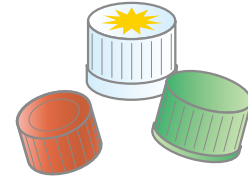

Medicine tablet sheets

You can dispose of snack bags with silver interiors with recyclable plastics if they have a "Pla Mark" on them.

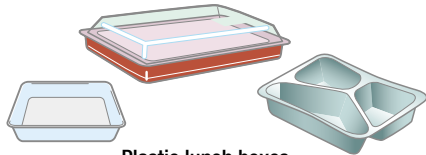

Tablets are combustible waste

Caps (lids)

Plastic bottle caps

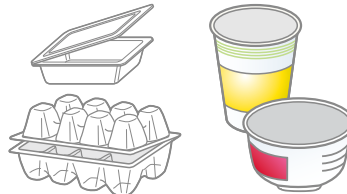

Trays

Plastic lunch boxes

You do not need to remove the price stickers.

Cups and packages

Egg packages, etc.

Cup noodle containers, etc.

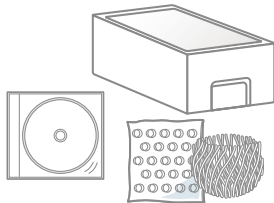

Bottles and tubes

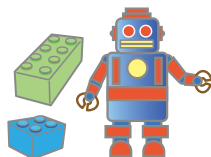

Shampoo, detergent containers, etc.

Others

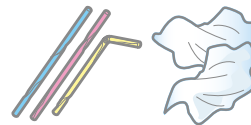

As for products without the "Pla Mark," we collect items that are obviously only made of plastic to prevent contamination of materials which are not suitable for recycling. Please see the following for details and sort them accordingly.

Styrofoam Cases (CDs, DVDs, etc.)

Toys made of plastic

Straws, plastic wraps etc.

Stickers such as price tags attached to plastic wraps and the like do not need to be peeled off.

Hangers made of plastics

You can dispose of them as recyclables even if the grips are metallic.

Plastic products between 30 cm and 60 cm

Plastic products 30 cm or longer on the longest side are treated as large-sized waste, in principle. However, the following products can be disposed of on recyclable plastics collection days.

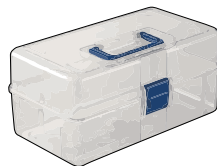

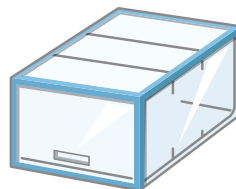

- Size: less than 60 cm on the longest side.

- Product type:

Cases, boxes and trays made only of plastic materials

*Must not include metal parts such as screws and casters.

Clothing storage containers and boxes (example)

*Can only be collected if the handles are also made of plastic materials.

Trays

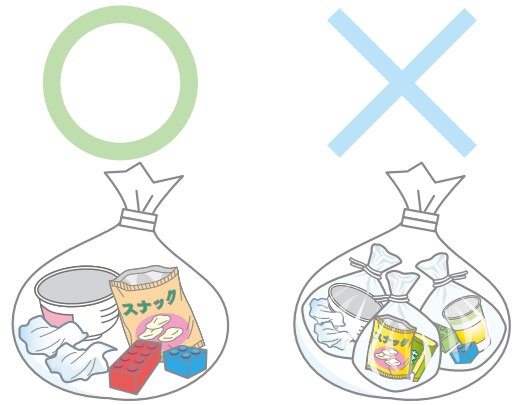

Uncleanable plastics

See page 12

combustible waste

How to put out recyclable plastics

- Organize all and only recyclable plastics into a lidded container or a see-through bag to put them out for collection. Do not double-bag.

- All bags are torn open to check if anything non-recyclable is mixed in with the collected recyclable plastics. Do not double-bag the plastics because it requires extra effort to open the bags.

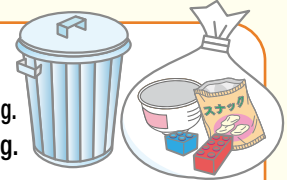

Tearing garbage bags and removing unrecyclable objects

How do I wash?

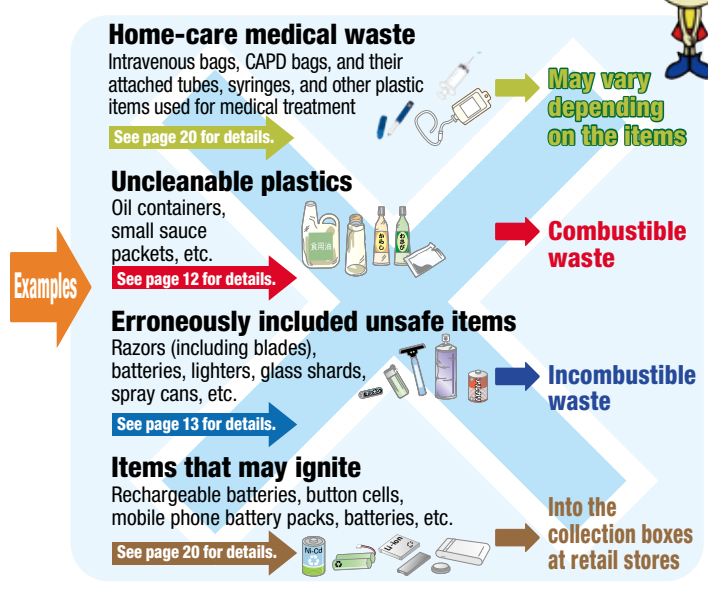

If it is dirty, please properly remove the dirt. Put it in a container with a lid or in a transparent or semi-transparent bag when disposing. Do not sort recyclable plastics in small bags, but put them together in one bag.

When a substance such as leftovers are still sticking to the items, it isn't possible to sort them out as recyclable plastics. Rinse items with water or use an old cloth to empty them of their contents. If there are only slight food stains on a plastic container, then it can be disposed of as recyclable plastic. Put all plastics in the same bag regardless of type. Do not separate them into smaller bags inside the garbage bag.

Items that cannot be disposed of as recyclable plastics

Prohibited items, such as waste from home medical care supplies and mobile batteries, are found mixed in with the recyclable plastics collected by Minato City. Syringes and intravenous bags cannot be disposed of as recyclable plastics, even if they are made of plastic. To prevent infections and ensure workers' safety, waste from home medical care supplies must be disposed of in accordance with the rules. Lithium-ion batteries and button cells may ignite. Bring and put them into the collection boxes at retail stores.

Recyclable items (Used paper, plastic bottles, bottles, cans)

Collected
Once
a week

8:00 am

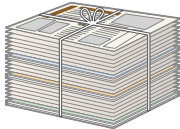

Please put out before 8:00 am. **Please don't put it out on the night before or after the collection day.** We cannot collect other garbage than recyclable items.

Separate them by type, and tie them with string as shown below.

Examples

Newspapers

Put fillers between newspapers.

Cardboard boxes

Flatten them.
*Cardboard boxes here means those with corrugated cross-sections.

Cartons

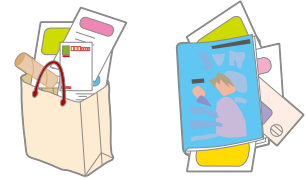

Only cartons that are white on the inside are collected. Remove the plastic spout.

Magazines

Remove clips, etc. wherever possible.

Other recyclable papers

Put them in a paper bag or between magazines.

Other recyclable papers

See page 9 for details.

Papers that cannot be recycled

The following papers are not recyclable.

Please put out these papers as combustible waste.

* May be partly different for group collection.

① Processed papers

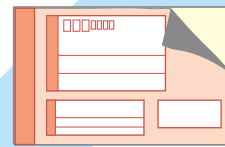

Papers with plastic or aluminum coating

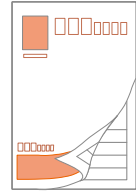

Waterproofed papers

Thermal papers

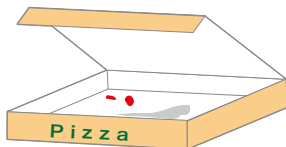

Carbon papers
Carbonless papers

Papers with glue (crimped postcards, etc.)

Other unrecyclable papers include photographs, iron-on transfer papers, foam papers, wet tissues, paper towels, and oven sheets.

② Dirty or scented papers

Pizza box

Used tissue paper

Detergent box

③ Shredded paper

Shredded paper

When putting out combustible waste, remove air from the garbage bag so that it does not burst when collected.

④ Paper containing non-plant derived material

Other examples include cellophane paper, diapers, sanitary products, non-woven fabric (masks, etc.), plastic-covered tissue boxes and envelopes.

Other recyclable papers

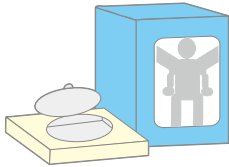

Recyclable paper, excluding newspapers, cardboard, paper cartons, and magazines

How to dispose

The following papers are recyclable. Please put them out as Recyclables.

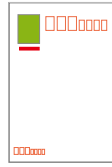

* Remove all non-paper materials (plastics, metals, etc.) from the recyclables.

Snack boxes and toy boxes

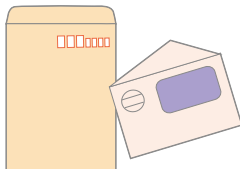

Remove all plastic parts

Postcards

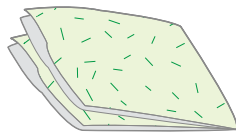

Crimped postcards are **combustible waste** [See page 12](#)

Envelopes

Remove the plastic parts from windowed envelopes.

Packaging papers • Paper bag

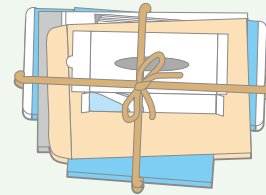

Put the recyclables in a paper bag

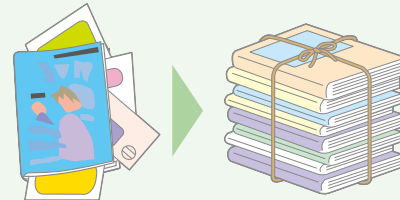

* Remove the handle if it is made of any material other than paper

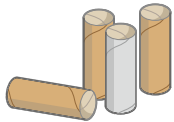

Bundle with string

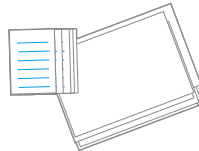

Place them between magazines and bundle with string

Toilet paper rolls and cling wrap cores

Memo and copier papers

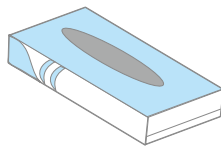

Calendars

Remove all non-paper parts

Tissues Box

Remove all plastic parts

“Other recyclable papers” of various sizes and shapes can be **put in a paper bag** without bundling them, or **put between magazines**.

Some combustible household waste contains recyclable papers, the majority being papers categorized in “Other recyclable papers” above.

[See page 3 for details.](#)

Why does used paper need to be sorted specifically?

Depending on the type of used paper, it is recycled into different paper. If a paper of a different type is included, it can prevent recycling or degrade the quality of the recycled paper. To effectively use limited resources, please sort your recyclables.

Recyclable items (Used paper, plastic bottles, bottles, cans)

Collected
Once
a week

8:00 am

Please put out before 8:00 am. **Please don't put it out on the night before or after the collection day.** We cannot collect other garbage than recyclable items.

Dispose all the recyclable items by type.

Should you wish to use collection bags for plastic bottles, or containers for glass bottles or cans, please ask the Minato Recycling and Waste

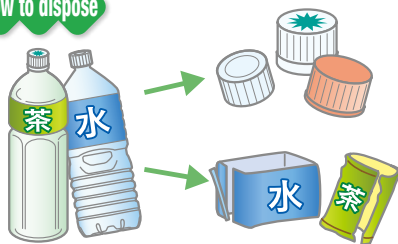

Plastic bottles

Items to be collected: Plastic bottles of beverages, liquors, soy sauces, etc.

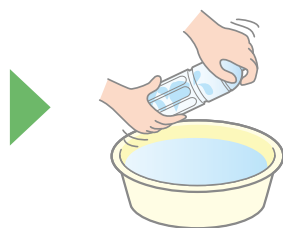

This mark is the indication.

How to dispose

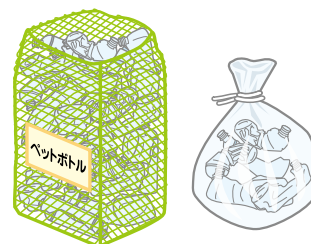

(1) Remove caps and labels. Removed caps and labels are to be treated as **recyclable plastics**.

(2) Rinse a bottle with water and crush it.

If the contents are contained, they cannot be collected.

Plastic bottles only

(3) Dispose of them after putting them in a plastic bottle collection net or a transparent or semi-transparent bag.

Bottles (for food and drinks)

How to dispose

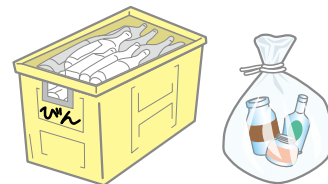

(1) First remove their caps or corks.

(2) Rinse it using water.

If the contents are contained, they cannot be collected.

Lay down

Bottles only

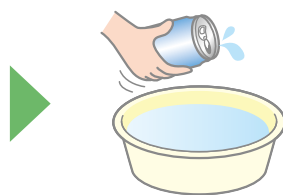

(3) Dispose of them in a container for their exclusive use or a bag inside of which can be seen from outside.

Cans (for food and drinks)

How to dispose

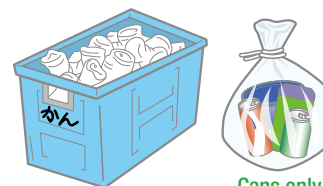

(1) Remove the inner lid (for cans) and dispose of the lid together with the can.

(2) Rinse it using water.

If the contents are contained, they cannot be collected.

Cans only

(3) Dispose of them in a container for their exclusive use or a bag inside of which can be seen from outside.

Bottles and cans from which oil can not be removed, bottles of cosmetics and chemicals, broken bottles and cups, etc.

See page 13

incombustible waste

Containers for bottles and cans

If you need to use a container for bottles and/or cans, please apply to the Minato Recycling and Waste Management Office. Bottles and cans put inside a container are collected with the container, and another folded container is placed in the collection center. In places where containers can get in the way of traffic, such as on the sidewalk, the manager of the collection center should immediately put away the containers.

Plastic bottle collection nets

Minato City lends out plastic bottle collection nets free of charge. The nets are available in two sizes: Large (1 x 1 m) and Small (0.6 x 0.6 m). Please make your application to the Collaboration Project Section of each Regional City Office, or the Minato Recycling and Waste Management Office.

Please join the group collection.

What is the group collection

Regional organizations such as the neighborhood association, PTA or administrative cooperative composed of more than 10 households of its residents may undertake collection of recyclable materials themselves, and hand them over to a recyclable collection and processing company. In this manner efforts are being put into reduction of volume and recycling of garbage.

* Used paper (excluding industrial waste) from small enterprises that meet the criteria of the Small and Medium Enterprises Basic Act (see below) can also be collected. However, since businesses cannot form a collective collection organization on their own, the waste paper must be provided to a local collective collection organization.

● **Small enterprises that meet the criteria of the Small and Medium Enterprises Basic Act**
Manufacturing, etc.: 20 employees or less **Commerce/Service, etc.:** 5 employees or less

* Please contact the Collaboration Project Section of each Regional City Office before starting the group collection.

Refer to

Collaboration Project Section of each Regional City Office

Shiba Region ☎ 03-3578-3123 Azabu Region ☎ 03-5114-8802
Akasaka Region ☎ 03-5413-7272 Takanawa Region ☎ 03-5421-7621
Shibaura-konan Region ☎ 03-6400-0031

If you want to stop group collection

Should you switch from group collection to district collection, please consult with the Collaboration Project Section of each Regional City Office and the Minato Recycling and Waste Management Office beforehand. In addition, we may not be able to accommodate a switchover in the middle of a fiscal year. Thank you for your understanding.

The ward will pay the following incentives to resource collection groups in accordance with the items and volumes collected.

Items		Incentives
Waste paper	Newspapers, magazines, cardboard	7 yen/kg
	Paper cartons and other recyclable paper	20 yen/kg
Fabrics		10 yen/kg
Metal items, bottles, others		7 yen/kg

* What can be and cannot be collected depends on the recyclable waste collection company, so check directly with the company.

Recyclable waste collection companies are listed on the List of Companies Registered for Group Collection on the City's website.

Taking away of recyclable items is against the municipal law!!

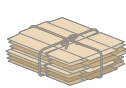

The City reinforces patrols to prevent taking away of recyclable items and control offenders.

There have been instances of waste being taken away at night in Minato City.

Minato City revised the "Minato City Ordinance on the Processing and Reuse of Waste" and prohibited the act of taking away recyclable items from recyclables and waste collection sites within the City.

In case the bylaw is violated, a fine up to 200,000 yen will be imposed.

What is prohibited to take away

Used paper (newspapers, magazines, corrugated cardboards, paper packages, other recyclable papers)

Bottles

Cans

Plastic bottle

To all the citizens

Please provide us with information on the act of taking away.

When you find the act of taking away recyclable items from the collection site you use, report it to Minato Recycling and Waste Management Office. However, refrain from trying to obtain information by yourself or contacting the violator recklessly to warn him/her. If you feel that there is a danger to yourself, report to the police.

Please utilize group collections.

It is effective in preventing taking away of recyclables because groups directly manage them.

There have been instances of waste being abandoned at night in Minato City. Please refrain from placing waste at collection sites the night before collection date.

The waste collection traders, who are entrusted to collect recyclable items by the City, paste stickers on the cars (see the photo on the right) and start collection after 8:00 am. Further, collectors of the recyclable items always wear working clothes and work in a pair.

Combustible waste (Waste that can be burned)

Collected
Twice
a week

8:00 am

Please put out garbage before 8:00 am. **Please don't put it out on the night before or after the collection day.** We cannot collect garbage other than combustible waste.

*In the Daiba district throw combustible waste into the garbage chute since it is collected via the "Garbage chute system".

Examples

Kitchen waste

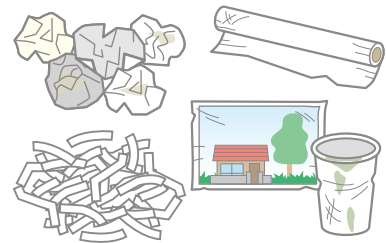

Drain water well before disposing

Uncleanable plastics

Plastics that cannot be cleaned should be disposed of with combustible waste.
For example:
Oil containers, small bags of soy sauce, etc.

Unrecyclable paper

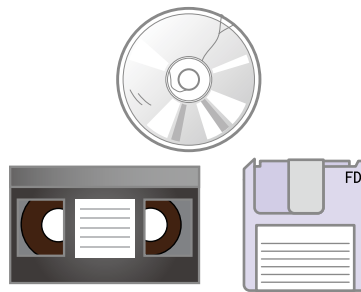

See page 8 for recyclable used paper.

Rubber, leather products

Remove any metals as much as possible before disposal.

CDs, videotapes, etc.

Clothes, disposable diapers, etc.

Flush the feces of the diaper in the toilet.

Others

For how to dispose of used face masks, see page 20.

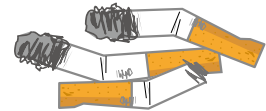

Small amount of twigs (less than 30 cm)

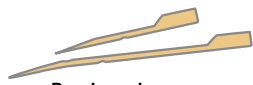

Waste cooking oil

Absorb the oil in paper, etc. or solidify it before disposing.

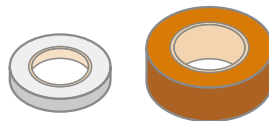

Cigarette butts

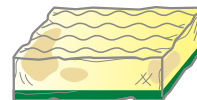

Bamboo skewers

Wrap the pointed end of the bamboo skewer in paper, etc. before disposing.

Adhesive tape

Sponges

cooling agents

How to dispose

Place combustible waste in a container with a lid or in a transparent or semi-transparent plastic bag.

Do not sort combustible waste in small bags, but put them together in one bag.

Only wearable clothing is collected at the collection points.

See page 22 for details.

Bird preventive nets can be lendred out.

See page 19 for details.

We grant subsidy for purchases of home raw-garbage processors.

See page 27 for details.

Collected
Twice
a month

Incombustible waste (Waste that cannot be burned)

8:00 am

Please put out the garbage before 8:00 am. **Please don't put it out the night before or after the collection.** We cannot collect garbage other than incombustible waste.

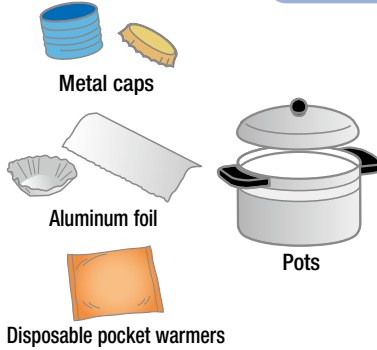

Examples

Ceramics, glass

Dispose with care! (see below) ⚠

Metallic products

Disposable pocket warmers

Dispose with care! (see below) ⚠

Small-sized home appliances of less than 30 cm

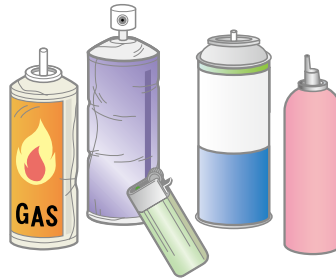

* Anything longer than 30 cm is large-sized waste.

Some products are collected by site-collection.

See page 21 for details. →

Gas cylinders, spray cans etc.

Dispose with care! (see below) ⚠

Light bulbs and fluorescent lights

Please put them in the case supplied when you bought them or wrap them in newspaper before you give them to us.

Dispose with care! (see below) ⚠

How to dispose

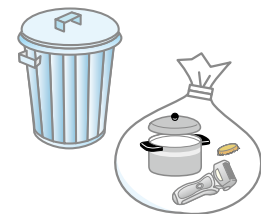

Dangerous items such as broken items, edged tools, electric bulbs, fluorescent lamps, etc.

Wrap in newspaper, etc. (as for electric bulb, etc., put it in the packaging material they came in and label “キケン” and dispose of it separately from other incombustible waste.

Incombustible waste other than dangerous items, gas cylinders etc., as stated in the left:

Place combustible waste in a container with a lid or in a transparent or semi-transparent plastic bag.

Gas cylinders, spray cans, lighters

- (1) Try to empty the contents wherever possible.
- (2) We collect these items even when contents remain inside.

*It is not necessary to poke a hole in gas cylinders or spray cans. If you are unable to use up the content or you have a large volume, please contact the Minato Recycling and Waste Management Office.

- (3) Separate it from other incombustible waste and mark “キケン” on the bag before disposing.

Gas cylinders, etc. (Gas cylinders, spray cans, lighters)

Garbage trucks compress the waste they carry. When flammable gases such as ones in spray cans, etc., and lithium-ion batteries and button type batteries, etc. enter a garbage truck, they may **ignite** and cause a **fire** in the garbage truck from the friction between metals. Please observe the sorting rules to prevent **fires** in the garbage trucks.

Recycle dry cell batteries...

Dry cell batteries can be collected as incombustible waste, but submitting to the collection point is preferred. For button-type and rechargeable batteries, please use the collection box at retail locations.

See page 22 for details. →

Large-sized waste

Prior
Application System
With charges

Large-sized waste is collected even if it has been disassembled.

Large-sized waste refers to

Large waste such as furniture discarded from a household (items whose longest side is 30 cm or longer) is large-sized waste. Dispose of it in the following procedure. Minato City does not collect large-sized waste discarded from businesses. Please request collection to a General Waste Disposal Operator which has received permission from the public institution.

*Household items that are made entirely of plastic and are **smaller than 60 cm** can be disposed of on the designated day for recyclable plastics. (What can be disposed of: Plastic cases, boxes, and trays (See page 6 for details). However, collectable items are limited to plastic items that not use other materials such as iron screws.

House pick-up

8:00 am

Please put out to **the designated place** before 8:00 am. **Please don't put it out on the night before or after the collection day.** We cannot collect other garbage than the applied items.

From application to disposal

1 Application to Minato Large-sized Waste Center

Apply online or by telephone to the Minato Large-sized Waste Center.
Application to Minato Large-sized Waste Center

☎ **03-6747-9253**

(8:00 am-7:00 pm Monday to Saturday)

Website address

<https://ecolife.e-tumo.jp/sodai-minato-tokyo-u/>

Before you throw it away as large-sized waste!

We collect wooden furniture for free.

For details, see page 26

- (1) **Internet application**
(Accepted 24 hours, excluding Year-end and New Year and maintenance times)
Go to the website on the left and follow the instructions to sign up.
- (2) **Phone application**
Service ours are from 8:00 am-7:00 pm from Monday through Saturday. (excluding Year-end and New Year)
 - ※ It may be difficult to get through during busy times
 - ※ Please see page 16 for information on applications for people (welfare recipients, etc.) eligible for reduced or waived fees.

2 Purchase the Minato City large-sized waste ticket

Sample

Specify the collection date, and your name or five-digit reception number.

Please purchase a Minato City large-sized waste ticket at a shop, supermarket, convenience store displaying the mark of dealing with these tickets or Minato Recycling and Waste Management Office. **Without Minato City large-sized waste ticket, the item(s) will not be collected.** Double-check your ticket at the time of purchase.

3 Put it out on the designated collection day

Put the waste in the **designated location (specified when you applied)** by **8:00 am** on the collection day.

Please write the scheduled collection date and your name or 5-digit reception number on the paid large-sized waste disposal ticket you purchased, attach the ticket to the large-sized waste, and put out the waste at the **specified location by 8:00 am** on the collection day.

- ※ Please refrain from placing it out the night before or after the collection time. Item(s) that have not been applied for will not be collected.

We carry out and collect large-sized waste. (Conditions apply) For details, see page 19

Some charges are free

Direct disposal

Disposal location Shibaura Waste Collection Work Office (3-1-18 Konan, Minato City). Please refer to the map on the right.

Day Every Sunday (excluding Year-end and New Year)

Submission time 9:00 am to 3:30 pm
When making a reservation, please choose either the morning session or the afternoon session.

Fee Please refer to the “Typical Large-sized waste fees” chart on pages 17 and 18.

※When bringing directly, please interpret the “Typical Large-sized waste fees” chart as follows.

JPY 400 → free, JPY 900→400,
JPY 1300 → 600, JPY 2300→1100,
JPY 2700 → 1300, JPY 3200→1600

Shibaura Waste Collection Work Office 3-1-18 Konan, Minato City

Process from application to disposal

1 Apply to Minato Large-sized Waste Center

Please apply to the Minato Large-sized Waste Center either by online or phone the same way as applying for house pick-up.

Before you throw it away as large-sized waste!

We collect wooden furniture for free.

For details, see page 26

2 Purchase a Minato city large-sized waste ticket

If a fee is charged, purchase a paid large-sized waste disposal ticket from Minato City in advance and write the date of collection and your name or 5-digit reception number. Attach the ticket to your large-sized waste. Please note that tickets cannot be purchased at the site (Shibaura Waste Collection Work Office) on the day that you bring in large-sized waste.

3 Bring the waste on the date and time specified at the time of application

Please bring it to the **Shibaura Waste Collection Work Office** on the delivery date and time specified at the time of application. You may bring item(s) by car.

※To prevent waste from being brought in by collection agencies, etc., please be sure to bring an ID (My Number card, driver's license (copies not accepted), etc.) that can confirm your address within Minato City. If you have not completed the address change procedure for your ID, please also bring a document that confirms your address within Minato City (such as a utility bill). If the person who made the application is unable to come to the facility on the day of collection, please contact the Minato Recycling and Waste Management Office in advance. If the person who made the application is not present, we may refuse to accept the waste.

※Same-day applications and submission of items not applied for will not be accepted. When visiting by car, please follow the directions of the staff and watch out for pedestrians and bicycles.

※The applicant is solely responsible for loading and unloading waste.

Please watch out for malicious businesses

Minato Recycling and Waste Management Office ☎ 03-3450-8025

- There are businesses which pass out fliers or have websites that claim they will dispose of unwanted household furniture, then charge obscene prices. Some even claim they will collect for free and then charge for disposal fees. Please only use authorized waste collection and transporting companies to protect yourself from becoming a victim. If you have any questions, please contact the Minato Recycling and Waste Management Office.

Application for reduction or exemption from large-sized waste fee

In Minato City, the following persons are exempted from large-sized waste fee.

Exempted persons

- 1 Those receiving welfare
- 2 Those receiving Child-rearing Allowance (including Special Child-rearing Allowance)
- 3 Those receiving Old-age Welfare Pension
- 4 Those eligible for support benefits such as for Japanese remaining in China

} Directly contact the Minato Recycling and Waste Management Office.

From application to collection

1 Apply to **Minato Large-sized Waste Center**

Application to Minato Large-sized Waste Center
☎ 03-6747-9253
 (8:00 am-7:00 pm Monday to Saturday)

Please call the Center for Minato Large-sized Waste to apply for the collection.

***People applying for reduction or exemption cannot apply online. Please tell the receptionist that you are eligible for reduction or exemption of fee.**

At a later date, an application form will be mailed from the Center for Large-sized Waste.

2 Submission of application and other documents

Please bring it to the Residents Support Section of each Regional City Office (excluding the Daiba Annex), the Minato Recycling and Waste Management Office, or mail it to the Minato Recycling and Waste Management Office.

(1) If you bring it to the Residents Support Section of each Regional City Office (except for Daiba Annex) or Minato Recycling and Waste Management Office

Bring the application form for reduction or exemption of fee and apply in person at the counter.

We will check its content and give you an approval of fee reduction or exemption, and a large-sized waste ticket.

***If you bring it to the Minato Recycling and Waste Management Office, you need a document proving your eligibility, such as a certificate of entitlement. Please pay attention to the expiration date of the qualification.**

(2) If you mail it

Send the application form and a copy of the certificate of qualification to the Minato Recycling and Waste Management Office.

After receiving it, we will check its content and send you an approval of fee reduction or exemption, and a large-sized waste ticket.

***It will take several days to reach us by mail, so please mail them so that they arrive here at least 10 days prior to the collection date.**

3 Putting out waste on the collection date specified at the time of application

Put the waste in the **designated location (specified when you applied)** by **8:00 am** on the collection day.

Please write the scheduled collection date and your name or 5-digit reception number on the paid large-sized waste disposal ticket, attach the ticket to the large-sized waste, and put out the waste at the **specified location by 8:00 am** on the collection day. If the aforementioned information is not listed on the ticket, the waste will not be collected.

※ Please refrain from placing it out the night before or after the collection time. Item(s) that have not been applied for will not be collected.

List of collection fees for typical large-sized waste

※When directly submitting large-sized waste, please interpret the fees on the 'Large-sized Waste Fees' chart below.
 JPY 400 → free, JPY 900→400,
 JPY 1300 → 600, JPY 2300→1100,
 JPY 2700 → 1300, JPY 3200→1600

As a general rule, items whose maximum side length exceeds 210 cm cannot be collected.

	Item name	Commission fee	
A	Air conditioners *Cannot be collected by the city. Please refer to page 24.

Home pick-up/ Large-sized waste dispatch collection

Applicable for Households composed only of people who fall into any of the following categories, and households in which residents have difficulty in carrying recyclable waste or waste to the collection location on their own (or carrying large-sized waste outside (to the designated location) on their own) and have no one around them who can help them.

- ① Those who are 65 years old or older
- ② Those who are certified as requiring nursing care in accordance with the Long-Term Care Insurance Act
- ③ Those who have a Shintai Shogaisha Techo (Certificate of the Physically Disabled), an Ai-no-Techo (Certificate of the Intellectually Disabled), or a Seishin Shogaisha Hoken fukushi Techo (Certificate of the Mentally Disabled)
- ④ Those who have designated intractable diseases and specially designated diseases

*Designated intractable diseases: Diseases provided in Article 5, paragraph (1) of the Act on Medical Care for Patients with Intractable Diseases. Specially designated diseases: Diseases defined in the 2nd category of Appended Table 1 of the Rules of Tokyo Metropolitan Government Concerning the Subsidies for Medical Expenses of Patients with Intractable Diseases.

- ⑤ Those who have a Maternal and Child Health Handbook
- ⑥ Those in a single-parent household who are raising an infant and it is before the last day of the month prior to the month when the infant turns one year old

*Applicable persons should provide a document that certifies they are in this situation (health insurance card, long-term care insurance card, etc.).

◆ Home pick-up

Details

Staff members will visit each house and collect waste and recyclable waste (excluding large-sized waste) at the entrance.

Fees

Free of charge

Application

Please call or send a fax to the Minato Recycling and Waste Management Office for consultation. Staff members will visit your house to check the current status of waste disposal etc. and determine whether or not you are eligible for the service. Note that you and your relative or a third party are requested to be present when the staff members visit the house.

*Please provide the name and phone number of a person to contact in case of an emergency.

◆ Large-sized waste dispatch collection

Details

The staff will visit your home and pick-up large-sized waste.

Fees

Pick-up fee is free of charge but a large-sized waste ticket is required for each item. (In some cases the ticket may be waived. Please inquire for details.)

Application

Please call or send a fax to the Minato Recycling and Waste Management Office for consultation. Staff members will visit your house to check the situation and determine whether or not they can carry out the waste on your behalf. (The following cases cannot be accepted, especially when it is dangerous.) When you live in an apartment house, you may not be able to receive the service due to the rules of your facility.

- ① You or your proxy cannot be present at the time of waste collection.
- ② Collection work may cause damage to the building.
- ③ Collection work involves danger.
- ④ The waste is long/heavy and cannot be carried out of the door.
- ⑤ Removal or dismantling work is required.
- ⑥ It is extremely difficult to carry out the waste.

Contact guidance

The staff, while talking with people of the district, are making efforts in improving their disposal methods and behavior. Those who have trouble following the segregation and collection days please consult the Minato Recycling and Waste Management Office.

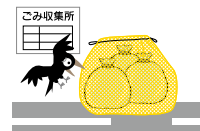

Extra waste collection

When a great amount of waste has to be disposed at one time due to the move of a household or pruning of trees, usual collection can not correspond to the need. Please consult the Minato Recycling and Waste Management Office. Do not take your waste directly to the Minato Recycling and Waste Management Office and Minato incineration plants.

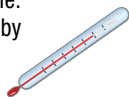

Lending out bird preventive nets

In order to prevent crows and cats from scattering garbage at the waste collection site, the city lends out the bird preventive nets free of charge to the person who can take care of the collection site. Collaboration Project Section of each Regional City Office.

About submitting waste which includes mercury

Garbage including mercury may cause stoppage in the incinerator at the waste plant. When submitting thermometers or manometers, please contact the Minato Recycling and Waste Management Office. A representative will collect directly from your home. Items submitted by businesses cannot be collected by the City.

Waste collection locations

There are about 12,000 waste collection sites in the City and people in the community are voluntarily cleaning and keeping the dustbins in good condition. While locations of the waste collection sites and their users are determined based on opinions of the people in the community, the locations should be the places where collection can be conducted safely. Please consult the Minato Recycling and Waste Management Office on matters regarding collection sites.

Disposal of deceased pets and other animals

Carcasses of pets and other animals weighing less than 25 kg will be picked up and buried for a fee of 3,000 yen per animal. Dead animals collected free of charge if they entered your property by chance or are on public roads.

The agency to contact varies depending on where the dead animal was discovered. Refer to the table on the right for contact information.

How to dispose of recyclable items and waste from business activities

In principle, recyclable items and waste from business have to be disposed of at the responsibility of the business establishments.

Recyclables or waste discarded by businesses must be treated appropriately. Therefore, in principle, the City will not collect such waste. All businesses must request waste collection/processing by an authorized waste collection and transporting company.

※ Companies denied by waste collection and transporting companies due to small amount of waste should inquire with the Minato Recycling and Waste Management Office. We will inform the companies which can collect and transport the waste.

Waste Management and Public Cleansing Act

Article 3 of the “Waste Management and Public Cleansing Act” establishes that “Businesses must assume responsibility for waste generated from their own business activities and carry out its proper processing.”

In addition, article 9 “Minato City Ordinance on the Processing and Reuse of Waste” establishes that “The business must take responsibility of the waste from its business and process it properly.”

Please use care regarding the method of disposing of waste.

A study by the Tokyo Fire Department has found that compressing the following items causes intense smoke and ignition.

If these are disposed of as recyclables or waste, there is a risk of ignition due to the compression function inside the garbage truck, or a risk of a fire occurring at the intermediate treatment facility. Please dispose of waste in the manner shown below.

Spray cans

- Use as much of the contents as possible without opening holes.
- Even if the can is empty, keep the bag separate and do not mix it with other waste.
- Write “ケケン (Danger)” or “スプレー缶 (Spray can)” on the bag and dispose of it as incombustible waste.

Rechargeable batteries, lithium ion batteries, button batteries

Some stores are collecting these items. Collection procedures may vary depending on the store, so please ask each store. For more information, please check the QR code below.

If you are refused by the store, please contact the Minato Recycling and Waste Management Office.

Heated tobacco products

Consult with the Minato Recycling and Waste Management Office.

Regarding the disposal of wastes from home care

Separate the waste from home medical care supplies as follows.

Recyclable plastics

Tablet wrapping films and containers of medicines for internal use and ointments made of plastic
*Plastic items other than the above must be disposed of as combustible waste, even though they have a plastic resin identification symbol on them.

Combustible waste

Gauze, degreasing line, testing paper, diapers, IV bag, syringes, CAPD bag and its attached tube etc.

Incombustible waste

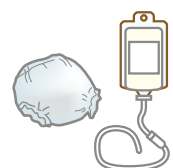

Empty medicine bottles, etc.

Injection needles

Return injection needles to the medical institution (hospital or clinic) that prescribed them, dispensing pharmacy, or home-visit nursing station.

Things to remember when disposing of waste from home

- CAPD bags and other medical-use bags should be emptied, with the residue properly treated, before putting them out as combustible waste.
- When putting them in bags for disposal, please be careful not to tear the bags.
- Please flush the dirty content of diapers in toilets before disposal.

Site collection

Site-collection is a system in which the city uses collection boxes installed in each Regional City Office to collect small-sized home appliances, plastic bottle caps, used clothing, waste cooking oil, used fluorescent lights and dry-cell batteries. **Items are limited to household items.** Locations of collection boxes are included in the Site-collection list on page 23.

Used small-sized home appliances (9 targeted collection items)

Some of small-sized home appliances disposed as incombustible waste contain useful metals (rare metals such as palladium or precious metal such as gold, silver, copper). Minato City utilizes these used small-sized home appliances effectively as resources and promotes recycling of useful metals.

How to dispose

• Please dispose directly to the yellow collection boxes installed at 14 city owned facilities.

9 targeted collection items

Used small-sized home appliances collection box

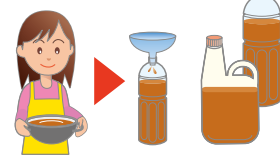

* Note

- Please erase personal information on the cellphone, etc.
- Remove all batteries, including lithium-ion batteries.
- Do not put items other than the nine eligible collection items in the boxes.

Collection of waste cooking oil

Let the waste cooking oil cool down to a room temperature and pour into an airtight container such as a plastic bottle using a funnel and close the cap tightly, and bring it to a place where a collection box is installed.

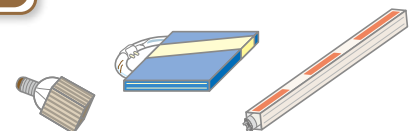

- * Limited to cooking oil only. Do not put oil other than cooking oil such as petroleum oil.
- * Cooking residue can be in the oil.

Collection of used fluorescent lights

Put straight tube/circle type fluorescent lights back into the original packages from the time of purchase or wrap them into newspaper to avoid getting broken, and bring them to a place where a collection box is installed.

- * Please dispose of broken fluorescent lamps as incombustible waste.

Plastic bottle caps collection

Caps collected by site-collection are handed over to recycling companies, and a portion of the proceeds from recycling are donated to NPOs that work to deliver vaccines to children around the world. PET bottle caps can be disposed of at collection centers as recyclable plastics, but we ask for your cooperation in collecting by site-collection.

Items that cannot be collected by Minato City / illegal disposal

Efforts to reduce garbage

Sorting list for recyclables and waste

Reduce unnecessary plastics!

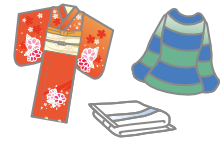

Used clothing collection

Please wash clothing and place it in a transparent bag and take the bag to the collection box. Dry cleaning is unnecessary. Collected used clothing is mainly reused overseas.

Items that can be collected

- All clothing that can be reused.
- Shoes and socks (only those with both left and right counterparts), towels, traditional clothing, an obi etc.
- ※Items must be reusable, so only items that can be worn again are allowed.

Items that cannot be collected

- Futons, cushions, pillows, rugs, carpets, etc.
- Rubber or vinyl items such as rubber boots, raincoats, etc.
- Company or other uniforms, items with names.
- Items used by pets.
- Items that are very dirty or wet.

* Note

- Please wash before submitting. Dry cleaning is unnecessary.
- It is not necessary to remove decorations such as buttons and belts.
- Shoes and socks must include both left and right counterparts. For sets that may get separated, please tie together with string or rubber band.
- Please use a transparent bag for bringing.
- Please separate shoes from clothing.
- When bringing on rainy days, please make sure items are not wet from rain.
- Please check that the clothing does not contain any valuable items before submitting.

Collection of used dry-cell batteries

Batteries contain valuable resources. In order to make effective use of these resources, collection boxes are set up and batteries are collected at each Regional City Office, library, Ikiiki Plaza, etc.

Items that can be collected

- Alkaline or manganese dry-cell batteries or (only cell-shaped)

Items that cannot be collected

- Rechargeable batteries, button-type batteries, cellphone battery packs, car batteries, etc.

According to the Tokyo Fire Dept., when rechargeable batteries or button type batteries such as lithium ion batteries are compressed, they may emit smoke and sparks. When disposing of these types of batteries, there is risk of fire from the compression function in garbage trucks. **Please dispose of rechargeable or button-type batteries such as lithium ion batteries by placing them in collection boxes at retail locations.**

Collection of ceramics and glass

Wrap the items in newspaper and place them in the collection box. If the items are broken, write "キケン" on the newspaper. Place unused gifts, etc., in the collection box while packaged in the original box.

Items that can be collected

- Crockery (plates, teapots, bowls, tumblers, coffee cups, etc.), cosmetic jars and bottles (Empty the contents and remove the cap.), sheets of glass less than 30cm in size

Items that cannot be collected

- Bricks, tiles, external wall materials, concrete blocks, lightbulbs

Toy collection

Household toys that are no longer needed are reused overseas through private companies.

Items that can be collected

- Household toys such as dolls, stuffed animals, diecast cars, radio-controlled cars, educational toys, acoustic toys, etc.

Items that cannot be collected

- Toys that are severely damaged or dirty, toys that cannot be used due to missing parts, toys that require an outlet to operate, dangerous toys such as air guns, pet supplies, discs such as CDs/DVDs, etc.

Toys that are too large to fit into the collection box (length 40 cm x width 40 cm x height 70 cm) are not accepted because their size will hinder collection and transportation.

Items that cannot be collected by Minato City

Items defined by the Home Appliance Recycling Law

For details, see the Minato City Website.

Items

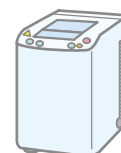

Air conditioners

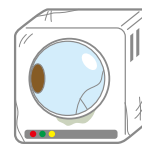

Televisions
(Cathode-ray tube, LC and Plasma, organic EL)

Refrigerators / Freezers

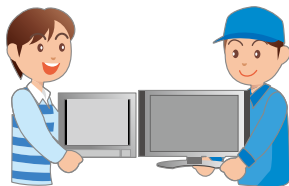

Washing machines

Cloth Dryers

How to dispose

When you buy a new item.

Contact the store where you plan to buy a new item.

When you want to dispose of an item.

Contact the store where you bought the item.

When you don't know the store where you bought the item.

*Please check the manufacturer's name and the model number beforehand.

Contact the Electric Appliances Recycling Reception Center.

☎ 0570-087200 (Navi Dial)
(9:00 am-5:00 pm Mondays to Fridays)

Online application (24 hours)
<https://kaden23rc.jp>

Personal computers

Collection by the manufacturer Please contact the manufacturer.

- Collection of computers with a PC recycling mark is free of charge. Please check the manufacturer's website for how to apply for collection.
- If the manufacturer is unknown, contact the PC3R Promotion Association Institute computer recycling center. (☎044-540-0576 from 10:00 am to 5:00 pm on weekdays (excluding weekends and holidays)) *You may also contact the center on the Internet: <https://www.pc3r.jp>

Collection by a delivery service Please contact Renet Japan Inc., the City's partner business operator.

- Apply for collection via Renet Japan's website (<https://www.renet.jp/>). A delivery service will come to your home to collect the computer at your preferred time.
- If the collected items include a computer, the collection charge will be free for only one box of items. (Size of one box: Sum of the dimensions is 140 cm or less; Weight: 20 kg or less) Printers and other peripheral devices can be collected with the computer. (The computer data is returned free of charge only if the person deletes it themselves.)
- Inquiry and application 0570-085-800 (Navi Dial) Opening hours 10:00 am-5:00 pm (excluding Year-end and New Year)

Fees are charged for the collection of PCs without the PC Recycle mark (those purchased before October 1, 2003).

* The above are collection companies are handled by the Minato Recycling and Waste Management Office. Please inquire at the respective companies.

Illegal disposal is a criminal offense!!

Let's prevent illegal disposal

Scattering waste will lead to more littering, which may eventually lead to illegal disposal. This will also spoil the beautiful atmosphere of the city, interfere with traffic, and cause a nuisance to neighbors. We request your cooperation in keeping the grounds and surrounding areas clean on a daily basis. Please refer to the section on the right for contact information for each location in the event that you discover illegal disposal. If you see illegal disposal, please contact your local police station.

Why not check the furniture recycling display?

“It can still be used” “It would be a shame to throw it away!” Do you have these kinds of wooden furniture just lying about your home?

The city will collect unwanted wooden furniture in good condition, free of charge, after assessing the quality of each piece, in order to reduce the amount of large-sized waste and promote effective use of resources through reusing the furniture.

After simple cleaning and repairs, the collected wooden furniture will be exhibited at the furniture recycling exhibition and will be sold for a fee to the first buyer.

Each household may buy up to two pieces of wooden furniture at a time. We sell wooden furniture from 500 yen, depending on its size and quality. Deliveries are only available to locations in Minato City. (transport of the item will be paid by buyer)

We will collect your good-quality unwanted wooden household furniture.

How to Apply

All wooden furniture must be assessed. Assessments will be made by prior appointment so please contact the "Furniture Recycling Exhibition Office," below.

Also, depending on screening results, collection may not be available of charge. We appreciate your understanding.

We do not accept any of the following cases:

- No elevator on and above the 3rd floor.
- If you can't take it out of the front door.
- When the road is too narrow for a pick-up vehicle to enter.
- If there is any other risk to pick up.

If you would like to see and buy the furniture on display !

Furniture-Recycling Exhibition Space

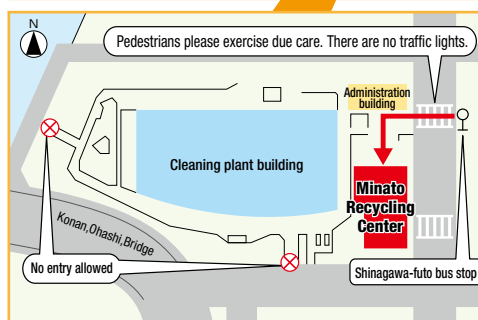

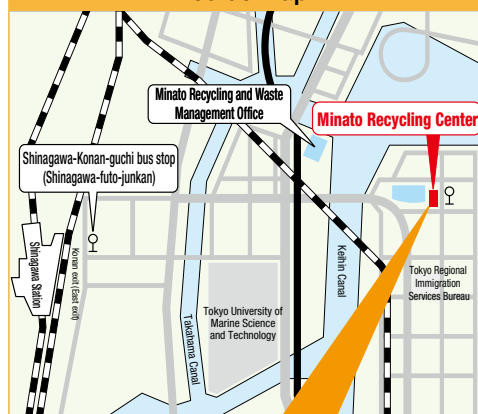

- **Place** Minato Resource Recycle Center (Minato incineration plant site, 5-7-1 Konan, Minato City)
- **Hours** 9:30am-4:30pm
※ The Center will close at 4:30pm so make sure you visit with enough time.
- **Closed** Closed on Sundays, the 3rd Thursday of every month, Dec 28 to Jan 3
- **Access** Tobus (Shina 99)Shinagawa -futo round trip Shinagawa-Konan-guchi exit→Shinagawa-futo bus station 1 minute by foot
※ There are no parking lots. General vehicles are not allowed to enter,so please use public transportation.

For inquiries about the application to take the items and the display dates

Guide map

Subsidy for purchasing household waste disposal or other equipment.

In order to promote the reduction and recycling of food waste, we subsidize part of the cost of purchasing household food waste disposal machines or other equipment.

Eligible households (those that meet the following requirements)

- ① Must be registered as a resident in the City.
- ② Must have purchased a household waste disposal or other equipment and must be able to use it continuously in the City for at least six months from the date of purchase.
- ③ Must not have received a subsidy within the past three years.
- ④ Three months must not have passed from the date of purchase of the household waste disposal or other equipment at the time of application for the subsidy.

Amount of Subsidy

Half the price (consumption tax included) of the purchase of one piece of equipment (rounded down to the nearest hundred yen). Limit of 20,000 yen (one piece of equipment per household)

Applicable Models

Waste disposal equipment for households* and compost containers

*For in-sink food waste disposals, only models with solid-liquid separation and food waste treatment functions whose installation is recognized by the Tokyo Metropolitan Government are acceptable.

Documents required for application.

Application form and original receipt.

*You can also download the application form from the Minato City website.

Additional Notes.

Conditions apply only if purchased by an individual.

For details such as requirements, please contact the Minato Recycling and Waste Management Office or visit the City's official website before purchasing.

Subsidies will be provided within the budget. Subsidies will be terminated when the cumulative total of applications reaches the budgeted amount for the year. We ask for your understanding in advance.

Use reusable tableware.

Reusable tableware rental.

In Minato City, we recommend the use of reusable tableware that can be washed and used repeatedly. We lend it out free of charge to events organized by town associations, residents' associations, schools, businesses, and various organizations that have bases in Minato City.

Subsidizing the use of reusable tableware.

When you rent reused tableware for events held in Minato City, part of the cost will be subsidized. The amount of the subsidy is half of the cost of renting reused tableware, including shipping and other costs, with a limit of 50,000 yen (rounded down to the nearest 100 yen).

For details such as requirements, please contact the Minato Recycling and Waste Management Office or visit the City's official website.

Please use the garbage sorting app

Minato City distributes a garbage sorting application for smartphones. It is packed with useful functions such as methods of separating resources and garbage, collection date calendar, and an alarm to prevent forgetting to put garbage out. You can download it from the app store or with the QR code below.

List of collection days for recyclables and waste

Sorting Waste / 3Rs and Reducing Food loss

Recyclable plastics

Recyclable items (used papers, plastic bottles, bottles, cans)

Combustible waste

Incombustible waste

Large-sized waste

Other consultations

Site-collection/ Food Drive collection locations

Items that cannot be collected by Minato City //illegal disposal

Efforts to reduce garbage

Sorting list for recyclables and waste

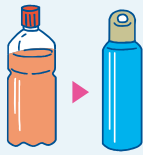

Reduce unnecessary plastics!

What we can do now!

Reduce Unnecessary Plastic

Easy Action 12

1

Bring your own bottle!

Instead of drinking from plastic bottles, use your favorite bottle or tumbler. You can also get bottles that are compact and foldable.

2

Use your own bag

Instead of getting shopping bags at convenience stores and supermarkets, always carry your own bag. It is convenient to have two sizes of bag, large and small.

3

Would you like to make your own lunch box?

If you make your own lunch, you can reduce garbage from the lunch containers bought in convenience stores or supermarkets. When buying cooking ingredients, bring your own reusable bag and choose products with simple packaging.

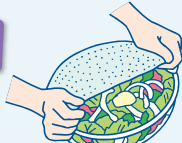

4

Take your own cutlery!

You never take plastic forks and spoons home to eat. But you can take your own cutlery to your workplace. Just say "I don't need plastic forks and spoons".

5

Use something that can be re-used many times!

Don't over-use convenient wraps and zipper bags for preserving food, and 'balans' that separate cooked dishes! Use ceramic or glass containers, or silicon products that can be re-used. Use something that can be re-used many times!

6

Use refillable products!

Use refillable products for shampoo, rinse, soap, or ballpoint pens. Perfect if you choose stylish ceramic or glass containers!

7

Let's choose simple packaging!

Refuse excessive packaging when you buy things at the store. Simple packaging can reduce household waste. Always choose simple packaging.

8

Do you really need promotion goods?

Plastic used in pocket tissues, fans and balloons which are distributed all over the city. Although it's easy to get them because they're free, don't accept so many promotion items.

9

Avoid using vinyl umbrellas!

You easily forget vinyl umbrellas, or you easily break them and throw them away, because you can get them so easily. If you use sturdy or folding umbrellas carefully, you can reduce plastic garbage.

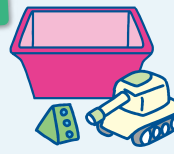

10

Use reusable tableware!

Let's reduce disposable tableware at parties and events by using reusable tableware. Minato City lends and subsidizes reusable tableware.

11

Please don't buy too many things!

Many plastics are also used for miscellaneous goods that are just over-purchased. Please don't buy too many things. If you do buy them, use them carefully to reduce garbage.

12

Make good use of recycled products!

Correctly sort plastic items you are not using anymore to make it possible for that plastic to be used to make new products. When purchasing items, choose Eco Mark certified products that are environmentally friendly.

SUSTAINABLE DEVELOPMENT GOALS

Resource collection and waste collection during stormy weather such as the approach of a major typhoon

In the event of stormy weather such as the approach of a major typhoon, all resource and waste collection may be canceled or collection times may be moved forward or backward. This is done to ensure the safety of all residents. If we make a decision to cancel, etc., collection services, notifications will be issued on the Minato City website, X (formerly Twitter) account, etc.

Minato City Environment and Recycling Support Department

We distribute information on X (formerly Twitter)! !
