ABOUT HOME-EXIT EVACUATION

Danger to life Secure your safety immediately!

LEVEL 4

LEVEL 3

Evacuation to Evacuation Shelters or Areas, etc.

■ Evacuation Shelters

Locations where residents whose homes have been damaged due to a disaster, flooded due to river overflow, etc., can live temporarily. When there is danger of a sediment-related disaster, Minato City may establish Evacuation Areas for urgent evacuation at Evacuation Shelters or other city-owned buildings. In such an event, you will be informed via the Minato City Disaster E-mail Service, the City website, etc. Evacuation Areas for urgent evacuation may be set up in the same location as Voluntary Shelters.

Evacuation shelter locations depend on disaster conditions.

■ Voluntary Shelters

In the event of an approaching typhoon that may cause damage within Minato City, Voluntary Shelters will be set up in advance by Minato City at city-owned buildings. These facilities will take in and shelter city residents who feel unsafe in their own homes. In such an event, notification will be provided via the Minato City Disaster E-mail Service, the City website, etc.
