Elderly, disabled, expectant/nursing mother, one-parent households
We will assist with installing anti-toppling devices for furniture.

Beneficiaries

Eligible households must have an address in Minato City, have difficulty installing anti-toppling devices for furniture on their own, and be one of the following:

(1) A household consisting of a person aged 65 or over living alone or only elderly people
(2) A household including one or more disabled members who qualify for assisted living care level 3 or higher (long-term care insurance certificate, certification result notice)
(3) A household including one or more holders of a physical disability certificate, Ai no Techo (intellectual disability certificate), or mental disability certificate
(4) A household including one or more members granted a medical care subsidy for an intractable disease
(5) A household including a pregnant woman in possession of a maternal and child health handbook or a nursing mother within one year after childbirth (until one month before the same month next year)
(a photocopy of the maternal and child health handbook)
(6) Single-parent household
(a photocopy of a proof of one-parent household, e.g., minor dependent allowance certificate, and medical assistance certificate for single-parent household)

Details of assistance

We will install anti-toppling devices for furniture supplied by Minato City in your house. The installation fees are paid by Minato City (if reinforcement work is required for the wall or ceiling, the cost of the work shall be paid by the applicant).

How to apply

Fill out the "Application for Anti-toppling Devices for Furniture and their Installation (for installation request)" and submit it to the Collaboration Project Subsection, the Collaboration Project Section of your nearest regional city office. Use the application form for installation request.

If you are an eligible household in category (2) to (6), bring the verification documentation with you.
If the household includes an expectant or nursing mother or is a single-parent household, submit a photocopy of the following documents.
(1) Household including expectant/nursing mother
Expectant: A photocopy of the front cover of the maternal and child health handbook
Nursing: A photocopy of the certificate of birth registration in the maternal and child health handbook
(2) Single-parent family
Proof of one-parent household, e.g., a photocopy of minor dependent allowance certificate or medical assistance certificate for single-parent household

Flow of installation assistance

We will visit your house and check whether your preferred kit can be installed before installing it.
※The kit you choose may not be mounted on some types of furniture or depending on the conditions of the house.
※ We will notify you of the date of visit by telephone in advance.

Notes on installation

(1) The kit may need to be screwed to the wall. In the case of rental housing, you must obtain the owner's approval before applying.
(2) It will take one to two months before we install the kit after receiving the application.
If the scheduled date of visit is not convenient for you, it may take several days more.

If you are not eligible:

The kits can be installed for a fee. To request the service, contact the following:
Minato District Council, Tokyo Federation, National Federation of Construction Workers' Unions (Minato branch of Tokyo Doken)
Tel : 03-3451-6673

Those living in housing for Minato citizens

When holes are drilled in a wall or ceiling for fastening furniture anti-tip kits, you do not need to restore it to its original condition.

Beneficiaries

An applicant living in city-managed housing, municipal housing, or designated public rental housing who has submitted the application for permission to install a structure, and who is granted permission

Details of assistance

The applicant is not required to restore to the original condition when holes are drilled in the wall or ceiling to install a screw-mount furniture anti-tip kit.
※There is no need to restore to the original condition when moving out.

Notes
1.When drilling in the wall or ceiling is needed to install a furniture anti-tip kit, be sure to submit the application for permission to install a structure and obtain permission.
2.Contact the designated housing manager to obtain the application form for permission to install a structure.
3.Attach necessary documentation to the application for permission to install a structure and submit to the designated housing manager.

Contact

Minato City designated housing manager: Tokyu Community and Tokyu Security Joint Venture
SVAX TT Bldg., 8F, 3-11-15, Toranomon, Minato-ku, Tokyo 105-0001

Business hours: Weekdays 9:00-20:00
2nd and 4th weekends 9:00-17:00

Column

What can I do to ensure safety in the house?

Besides anchoring furniture, you can reduce the number of pieces of furniture or change the layout to prevent injury in an earthquake.
Take measures in order of 1 to 3 below:

1 Use fewer pieces of furniture.

2 Rearrange the layout.

3 Anchor furniture.

List of anti-toppling devices for furniture

Description	Kit No.	Point
Magnitude 7 ML-35	Brown 7930	63
	Ivory 7920	63
Magnitude 7 ML-50	Brown 7931	63
	Ivory 7921	63
Magnitude 7 ML-80	Brown 7932	63
	Ivory 7922	63
Funbari-kun Z	7098	88
Furniture anti-toppling strap "Biyonta"	7343	28
Super Fudo-oh Hold	7425	54
tafuca Rack Flat Bear	7188	44
tafuca Multiplate Bear	7189	44
T-plate Multirubber adhesive-mount	7184	40

Description	Kit No.	Point
Tansu Guard II	7045	14
Furniture anti-toppling wedge "Funbaru-kun"	7050	18
Transparent anti-seismic pad "G-BLOX gel"	7328	23
E-pitatto for TV	7185	30
Seismic restraint strap for office equipment	7345	16
TV Guard fastened with wing screw + strong adhesive	7186	27
TV Guard fastened with strong adhesive + strong adhesive	7187	30
Cat security door lock	Black 7190	9
	White 7191	9
Door lock	7039	12
Shatter-resistant glass film	7037	31

Point limits (1) One- or two-person household: 200 points
(2) More than three-person household: 250 points

Magnitude 7 (a set of two)

Easy to mount without damaging furniture.

The structure is simple and robust. The kit has an auxiliary plate to prevent furniture from sliding on a smooth floor surface for added safety.

▲Auxiliary plate

Check the distance between the furniture and the ceiling before applying.
If the distance is exactly 35 cm or 50 cm, choose one size up.
Material: Steel (melamine baked coating)

The kit may not be mounted on some types of furniture or ceilings.

ML-35 25~35cm (brown) 7930 (ivory) 7920
ML-50 35~50cm (brown) 7931 (ivory) 7921
ML-80 50~80cm (brown) 7932 (ivory) 7922

63 points

▲Ivory

▲Brown

Funbari-kun Z (a set of two)

Can be mounted in a small space without damaging the ceiling or wall.

The kit is installed between the furniture and the ceiling.
It will not damage the ceiling or wall.
It can be installed in a small space of 10–20 cm.
※Check the distance between the furniture and the ceiling before applying.

Height from furniture to ceiling: 10–20 cm
Material: Steel (High-density urethane is used for the contact surface with furniture.)

The kit may not be mounted on some types of furniture or ceilings.

7098
88 points

Furniture anti-toppling strap "Biyonta" (a set of two)

A fridge or other piece of furniture is prevented from falling by fastening it to the wall with the adhesive pad and the impact of an earthquake is reduced by the rubber strap.
Furniture weighing up to 160 kg can be anchored with two straps.
Space between wall and furniture: 100 mm max.

7343
28 points

Super Fudo-oh Hold (a set of two)

Mounted with adhesive sheet without damaging the ceiling or wall.The kit absorbs seismic motions flexibly and strongly to prevent furniture from falling.

Space between furniture and wall: 0–9 cm
Material: ABS resin and polyurethane foam

The kit may not be installed on some types of wall materials.

7425
54 points

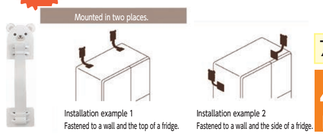

New tafuca Rack Flat Bear (a set of two)

7188
44 points

New tafuca Multiplate Bear (a set of two)

7189
44 points

Designed to withstand a seismic intensity of 7 on the Japanese scale of 0 to 7. These kits fasten the furniture to the wall firmly. They are mounted with strong adhesive so there is no need to drill a hole in the wall.
In addition, the rubber strap absorbs the impact of an earthquake and reduces the force applied to the wall. No screws are required.

New T-plate Multirubber adhesive-mount (2 per pack)

No drilling in the wall is needed to mount it. Fasten the kit by winding the rubber strap around a post of a rack or sticking it to furniture such as a cabinet.

7184
40 points

Furniture anti-toppling wedge "Funbaru-kun" (a set of two)

Inconspicuous, simple in design, and easy to install.
The shape is designed to withstand earthquakes just by laying it under the front of furniture.
Material: Synthetic elastomer
4.3 (width) × 90 cm (can be cut to the desired length)

Seismic performance test (intensity of 7)

▲Cupboard with the kit installed

▲Cupboard without the kit

▲Funbaru-kun

7050
18 points

New E-pitatto for TV (a set of two)

The strong adhesion anchors the TV firmly to prevent it from tipping or falling backwards. The kit is compatible with various types of legs, e.g., stand legs and center base.

Stand legs (using 1 set)

Center base (using 1 set)

7185
30 points

New TV Guard fastened with wing screw + strong adhesive (a set of two)

The strap is easy to attach and detach by securing it to a wall-mounting hole on the back of the TV with the supplied screw; the screw can be turned easily by hand.
Compatible with TVs of all manufacturers (excluding those without wall-mounting holes).

◀Installation example

7186
27 points

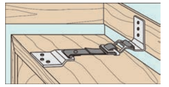

Tansu Guard II (a set of two)

Anchors a closet securely.

This is seismic hardware to fasten furniture to a wall to stop it falling.
Two straps, 12 wood screws, and four concrete nails
Effective installation length: Approx. 10–90 cm

The kit is installed with screws and so drilling in the furniture and wall is needed. If the kit is mounted on a fireproof board or other wall in which screws cannot be secured, the intended effects may not be attained.

7045
14 points

Transparent anti-seismic pad "G-BLOX gel" (4 per pack)

Just lay the pads under a PC or monitor, and their strong adhesion absorbs the impact and vibrations of earthquakes. The pads are only 3 mm thick to keep the center of gravity low and ensure stability.
Material: Polyurethane 50 × 50 (width) × 3 mm (thickness)

7328
23 points

Seismic restraint strap for office equipment "Link stopper" (a set of two)

The kit anchors a PC or TV to prevent it from tipping or falling in an earthquake. The adhesive pads secure the PC or TV firmly. The strap is easy to attach and detach using the slotted screw.
Material:
Flame-retardant material

16 points 7345

New TV Guard fastened with strong adhesive + strong adhesive (a set of two)

Use this kit if the TV has no screw holes on the back or if you don' t want to screw into the TV cabinet. It is secured to a cabinet with adhesive.

7187
30 points

PCs, TVs, and other electrical appliances may ignite when damaged. Prevent them from tipping or falling with restraint devices.

A seismic restraint device will not function unless the fastening surface is stable.

New Cat security door lock

This is a safety kit to lock hinged doors. It prevents the doors from flying open and plates and glasses from crashing to the floor in an earthquake. It also helps prevent children from opening the doors.

▲Left: Black, Right: White

▲Installation example (locked)

▲Installation example (unlocked)

Black 7190 White 7191

9 points

Door lock (a set of two)

Prevents injury by broken tableware and glassware.
The kit is screwed to the cupboard doors and the durable chain prevents the doors from opening and dishes flying out in an earthquake.
Contents: A pair of brackets and two chains (6 cm and 9 cm long)

▲Installation example

As the kit is fastened with screws, holes need to be drilled in furniture.

7039
12 points

Shatter-resistant glass film (for flat glass)

Prevents shards of broken glass from scattering.
It is easy to adhere to glass to prevent scattering.
92 cm (width) × 185 cm
※ The package is subject to change.

7037
31 points

▲Left: Glass doors with the film, Right: Glass doors without the film

▲Shatter-resistant glass film

How to apply

Beneficiaries

Residents of Minato City who have registered their residence

You can also apply via the electronic application service.
Logo Form▶https://logoform.jp/form/Mt5V/491555

How to apply

- Fill out the "Application for Furniture Anti-tip Kits" and submit it to the Collaboration Project Subsection, the Collaboration Project Section of your nearest regional city office.
- The point limits vary with household size. Check your household size, choose the furniture anti-tip kits you need from the list, and apply for them.

①One- or two-person household = 200 points ②More than three-person household = 250 points

※Your household size is the number of family members based on Minato City resident registration.
※Assistance with installation is available for elderly-only households and households including a disabled person or an expectant or nursing mother. Use the "Application for Furniture Anti-tip Kits and their Installation (for installation request)". For details, please see the reverse.
※A submitted application is reviewed and the Disaster Prevention Section will notify you of the decision. The kits will be delivered by a supplier designated by Minato City. (Please note that it will take about three to four weeks to deliver the kits after an application is submitted. Upon receipt, please affix your seal to the proof of delivery.)

Notes on application

- This support is offered to a household only once. (from April 2026 onwards)
- Installing anti-toppling devices for furniture will make furniture less likely to fall in an earthquake. However, they may not be effective depending on the size of an earthquake or the conditions of the house. If furniture falls, Minato City cannot be held responsible for any loss or damage.
- To request return or replacement, contact the Community Disaster Prevention Support Subsection, the Disaster Prevention Section within ten days from the date of delivery. If a kit has a defect, flaw or stain, we will replace it free of charge.

※If the replacement is for the applicant' s convenience, the applicant must pay the shipping fees.
※Return and replacement requests are not accepted beyond 10 days after delivery.
