~みなと保健所からのお知らせ~ お子さんの定期予防接種はお済みですか?

感染症にかかってしまうと、発病したお子さんの負担は大きく、小学校を休むことにもなってしまうかもしれま せん。また、保護者の負担も大きくなることが予想されます。

定期予防接種は、種類ごとに接種対象となる年齢が異なっています。お子さんの母子健康手帳(親子手帳)の 予防接種のページを確認し、未接種のものがある場合には、接種を受けることをおすすめします。

●小学校入学前に受けておきたい定期予防接種

種類	接種回数等	定期予防接種対象年齡等
麻しん風しん混合(MR) ワクチン	2回 令和7年3月31日まで→	第1期 1歳児で1回 第2期 小学校入学の前年で1回
ジフテリア、百日せき、破傷風、ポ リオ混合ワクチン(DPT-IPV)	4回(0歳児で3回、1歳半児で1回)	生後 2~90 か月(7歳半)未満
日本脳炎ワクチン第1期	3回(3歳児で2回、4歳児で1回)	生後6~90 か月(7歳半)未満

※港区は、『予防接種予診票』を持参して指定医療機関で接種を受ける、個別接種方式で接種を行って います。定期予防接種を受ける際に、種類・回数の合った予防接種予診票を持参しなかったり、予防接 種予診票の有効期限(接種期限)を過ぎてしまいますと、任意接種(自費)となります。

*『予防接種予診票』を紛失等された場合、再発行をいたします。接種前にみなと保健所までご連絡ください。

みなと母子 (親子) 手帳アプリのご案内 ☆

誕生日、性別などを登録するだけで予防接種のスケジュール管理ができる便利なアプリです。 これまでの予防接種歴を登録すれば、受けていない予防接種のリマインドも可能です。

~Notice from Minato Public Health Center~

Are your child's routine vaccinations completed?

The burden caused by a child who develops symptoms after contracting an infectious disease is great, and they may even have to take time off school. We can also assume that the burden on the child's guardian(s) will grow. The ages at which routine vaccinations are given differ depending on the vaccination. We recommend you check your child's vaccination page in your Maternal and Child Health Handbook and have your child vaccinated if there are any vaccinations they have not had.

• Routine vaccinations you should have before enrolling in elementary school

Туре	No. of doses, etc.	Age at which routine vaccination is given, etc.
Measles and rubella (MR) vaccine	Two Up to March 31, 2025→	One dose at one year old One dose the year before elementary school enrollment
Diphtheria, pertussis (whooping cough), tetanus and polio (DPT-IPV) vaccine	Four (three at 0 years old, one at 18 months)	From 2 months old up to 90 months (7 ½ years old)
Japanese encephalitis vaccine 1	Three (two at three years old, one at four years old)	From 6 months old up to 90 months (7 ½ years old)

^{*}In Minato City, vaccinations are administered through an individual-based vaccination system, wherein people bring their "preliminary vaccination questionnaire" to a designated medical institution to receive vaccinations. If you do not bring your preliminary vaccination questionnaire for the relevant vaccination type/dose when receiving a routine vaccination, or your preliminary vaccination questionnaire has exceeded its period of validity (vaccination period), the vaccination will be considered optional (self-funded).

|☆Introducing the MINATO Maternal and Child/Parent and Child Health Handbook App☆

This handy app allows you to manage your child's vaccination schedule simply by registering information such as their date of birth and gender.

If you register their vaccination history to date, you can also receive reminders for vaccinations not yet administered.

VEB Version (roneedtodownload)

You can also view summaries of the latest information about diseases and information about child-rearing.

^{*}If you lose your preliminary vaccination questionnaire, it can be reissued. Please contact Minato Public Health Center before your vaccination.
