H-3 Site of the seppuku (ritualistic execution) of Oishi Yoshitaka and the other 16 Akougishi (Akou Roshi) samurai

A place where 17 Akougishi (Akou Roshi) committed Seppuku (ritual suicides)

On 4 February, 1703, Yoshitaka Oishi (Kuranosuke Oishi) and 16 Akougishi (Akou Roshi) committed seppuku (ritual suicides) at the Hosokawa House in Kumamoto Domain.

Long ago, it was believed that the heart existed in the stomach, so "seppuku" was regarded as a way for demonstrating the honor of a Samurai.

Course Feature

There are many slopes throughout the course. In particular, Katsura-zaka, which leads to Takanawa Fire Station Nihonenoki Branch, has a steep slope, so we recommend that you be accompanied by a caregiver.

It is a shortcut to Sengakuji Temple and is a quaint alley, but the road is narrow (70 cm wide at its narrowest) and continues downhill (maximum gradient of about 10°) (there are places where wheelchairs cannot pass each other).

There is a 50-meter-long temporary sidewalk along the road due to construction.
