

# POLICY 3 Thoroughfare and Transportation

## Establishing well-maintained streets, and convenient transportation networks

### —The Basic Principles—

- A variety of transportation methods will allow the establishment of a comprehensive and hierarchically organized transportation system.
- We will focus on strengthening the function of existing transportation hubs to upgrade the accessibility and convenience of transferring at stations.
- We will construct transportation networks, based on the idea of functionality, ranging from local streets to arterial thoroughfares.
- With the promotion of a healthy lifestyle and efficient sightseeing in mind, we will improve and encourage the usage of our bicycling environment.
- We aim to establish a “Fun-to-walk City” inspired by the idea of Universal Design.

# POLICY 4 Greenery and Water

## Creating a city rich in greenery and water

### —The Basic Principles—

- Designing greenery and water infrastructure networks as one of the fundamental elements of the city
- We will encourage the recovery of environmental resources in support of biodiversity.
- We will ensure the protection and expansion of parks and open spaces, to develop a lively city full of beautiful greenery and water.
- We will sustain and utilize the greenery and water for security and disaster prevention purposes in the community.
- We will create unique cityscapes by making tactful use of historic sites in symphony with their geography and greenery.
- We will make use of residents’ active participation, and promote collective community action to enrich the environment in our community.
