

# Caution! How to Dispose of Garbage

To prevent the spread of COVID-19, follow the rules of disposing of garbage.

Seal off garbage that may spread infection, such as used masks or tissues, in a plastic bag and put it in a garbage bag.

Exceptionally, please dispose of plastic bottles, bottle caps, and recyclable plastics used by an infected person, his or her families, or a person suspected of being infected as burnable garbage.

Tie the mouth of the garbage bag tightly when disposing of the garbage.

Take measures to prevent the damage caused by crows.

## How to dispose the garbage

① Put a garbage bag in a trash. Tie the mouth of the bag before it gets full as in the figure.

② Tie the bag tightly without touching the garbage such as used masks.

③ Wash your hands with running water using soap after disposing the garbage.

※ If the garbage touch the outside the garbage bag, please put the bag in another garbage bag.

Your cooperation can reduce the infection risk to the operators engaged in garbage collection, sorting, and disposal work. We ask for your cooperation in preventing the spread of COVID-19.
